- After the expiration of the time allocated for work, within 5 minutes the masters collect their tools and leave the working area, the model stays on the stage.

Evaluation system

1. General impression (maximum - 5 points):	<i>Cleanliness of execution, general aesthetics, matching the shape of the fingers and hands of the model</i>
1. Length (maximum - 5 points):	<i>Must be the same from finger to finger on both hands. The lengths on all the fingers should be aligned during the manicure</i>
2. The form (maximum - 5 points):	<i>The form should reflect the aesthetic vision of the master, emphasize the beauty of the hands, the shape of the fingers and brushes of the model, or skillfully camouflage the shortcomings. The form is arbitrarily chosen by the master, but must be the same on the 10-nails model</i>
3. Free edge of nail (maximum - 5 points):	<i>The free edge of the nail should have a smooth and smooth surface. Under the free edge, there should be no nail dust, as well as "fringe". When testing the tool under the free edge, there must be a 100% clean space</i>
4. Cuticle (maximum - 5 points):	<i>10 fingers are processed. The keratinized part of the cuticle should be removed by any method, except for the hardware. Line cuticle should be smooth and clear. Lateral and posterior ridges should not have cuts, cracks, etc., which may occur during the manicure. On the periphery of the cuticles there should be no notches, burrs and cuticle residues. Moderate redness of the skin of the rollers is permissible</i>
6. The technique of applying gel-varnish (maximum - 5 points):	<i>The nail bed is covered with gel-lacquer under the cuticle. First of all, the technique of applying this gel-varnish in the area of the cuticle and on the surface is taken into account. Lacquer layer should be applied evenly, without blemishes, blackouts and marble effect. The border of the varnish near the cuticle line should be perfectly even, without sagging. Between the cuticle and the varnish should be left a minimum strip of natural nail, a thickness of not more than 1/3 millimeter. The thickness of this strip should be identical on all nails. In the area of the rollers, the varnish should be applied smoothly, without drips. The free edge should be evenly covered with gel-varnish. The surface should be smooth, smooth and shiny without a visible relief of a natural nail</i>
